# Proiect de interviuri cu evrei din Bucovina

Tell us your story!

The Bukovina-Institute of the University of Augsburg is looking for new interview partners.

Were you or your parents/grandparents born in the Bukovina or did your family originate from this region (today: Ukraine/Romania)? For the archive of the Bukovina Institute, an affiliated institute of the University of Augsburg, we are now collecting the stories of (former) Jewish Bukovinians or their immediate descendants.

We are interested in narratives of all kinds: Stories about their local life, the family history and their childhood in the "old homeland". Which professions did your relatives have and how did they live with other population groups? Of great importance are also the memories of the National Socialism period, deportation, flight, displacement and the search of a new home.

The experience from numerous interviews, that were already conducted, shows: Even those who fear that they will be able to report only little or nothing at all often recall aspects in the interview that have never been recorded in this form before. Every story counts!

Do you know someone from the Bukovina, or do you have relatives yourself?
